

RASHIKA BINDAL

PRODUCT MANAGER | AI & GENAI PRODUCTS | E-COMMERCE | FINTECH | DIGITAL TRANSFORMATION

Gurugram, India (relocating to Dubai, UAE) | +91-8588089956 | rashika.bindal@gmail.com | linkedin.com/in/rashika-bindal | Portfolio: rashikabindal.vercel.app

Nationality: Indian | Availability: Immediate joiner | Open to relocation across the UAE and GCC

PROFESSIONAL SUMMARY

Product Manager with 6+ years of experience in product strategy, product discovery and agile delivery across BFSI, fintech and enterprise SaaS, at American Express, Citibank and HSBC. Proven record of 0 to 1 product launches: took a digital account-opening pilot live across cities at Citibank and shipped a new simulation capability on American Express's compliance platform that prevented ~50% of annual production failures. Currently building a 0 to 1 consumer AI venture in stealth, solo, from first PRD to working code using AI-assisted development. Combines strong data-driven decision making (SQL, Power BI, Tableau) with cross-functional stakeholder management across engineering, design, compliance and C-suite, and a deep personal grounding in beauty, skincare and fashion as consumer categories.

CORE COMPETENCIES

Product Strategy & Roadmap | Product Discovery & User Research | 0 to 1 Product Launch | Go-to-Market (GTM) Strategy
AI & GenAI Product Development | E-commerce & Marketplace Products | Digital Transformation | Agile (Scrum) Delivery
KPI & OKR Design | Data-Driven Decision Making | Stakeholder Management | Cross-Functional Team Leadership
PRDs & User Stories | Experimentation & A/B Testing | Customer Journey Mapping | UAT & Data Governance | P&L Awareness

KEY ACHIEVEMENTS

- **Prevented ~50% of annual production failures** at American Express by conceiving and shipping DLM Gold Simulation, a dry-run compliance capability that also delivered ~90% execution-time estimation accuracy for the first time.
- **Cut corporate entity onboarding from 10+ days to under 48 hours** at Citibank by leading a 0 to 1 digital account-opening pilot from problem framing to live launch across select cities.
- **Delivered ~\$500K revenue impact and a 25% increase in product adoption** through SQL-driven KPI strategy, customer journey analytics and cross-sell optimisation.
- **Enabled GenAI at enterprise scale** by coordinating 72 data pipelines into LUMI, American Express's cloud-native AI platform serving 15,000+ internal data users.
- **Built a full-stack consumer AI product solo**, from product vision and PRD to a working prototype (authentication, media pipeline, AI core, community feed), using AI-assisted development.

PROFESSIONAL EXPERIENCE

Founder & Product Builder | Independent Consumer AI Venture (in stealth), Remote | Jan 2026 to Present

- Defining product vision, product strategy and roadmap for an AI-powered discovery and commerce experience in a visual, brand-led consumer category; in stealth while building, demonstrated in private demos.
- Building the full product solo using AI-assisted development (Cursor, Claude, applied AI models): a working prototype live end to end with authentication, media pipeline, an AI-driven core experience and a community feed.
- Designing the marketplace incentive model for how users discover, evaluate, decide and re-purchase, grounded in first-hand user research and category immersion.
- Running rapid ideation, prototyping and iteration cycles to de-risk product decisions before scaling, with every feature validated against real user flows rather than mockups.

Product Manager, Data & AI | EY India (Client: American Express), Gurugram | Sep 2024 to Apr 2026

- Led product strategy and delivery for the enterprise Data Lifecycle Management (DLM) platform, a compliance-critical utility governing regulated data deletion across the bank, through 10+ Agile sprints.
- Conceived and shipped **DLM Gold Simulation**, a self-serve dry-run capability that prevented ~50% of annual production failures and enabled ~90% execution-time estimation accuracy, transforming scheduling from guesswork to evidence.
- Owned end-to-end product discovery: user interviews with compliance and engineering teams, problem framing, PRD definition, prioritisation against squad KPIs, rollout strategy and adoption enablement.
- Coordinated the migration of 72 data pipelines into LUMI, American Express's next-generation cloud-native AI platform (15,000+ internal data users), validating data quality, governance and metadata standards to unlock GenAI use cases such as real-time personalised offers.
- Managed stakeholder engagement across 8 to 10 business, engineering and compliance functions; cut audit timelines by 30% and manual effort by 35%.
- Established 50+ business glossaries and metric definitions, improving data accuracy by 20% through validation rules and ownership models; drove analytics adoption through Power BI and Tableau enablement across a global multi-disciplinary team.

Business Data Manager | Uptitude (data and analytics advisory), Gurugram | Jan 2024 to Aug 2024

- Designed the end-to-end data validation strategy and anomaly-detection frameworks that reduced financial discrepancies by 20% and strengthened data integrity across business-critical pipelines.
- Translated deep-dive exploratory analysis into structured business improvement recommendations within an Agile advisory delivery model, presenting directly to client leadership.

Business Data Analyst | HSBC, Gurugram | Apr 2023 to Sep 2023

- Delivered root-cause analysis and process diagnostics across data pipelines; built SQL-driven remediation frameworks that improved operational efficiency by 15%.
- Led structured UAT delivery for data pipeline changes, defining test strategies and governing defect resolution end to end across business and technology teams.

Analyst, Data & Business Intelligence | Citibank India, Gurugram | Feb 2020 to Feb 2023

- Led the end-to-end **0 to 1 pilot of Suvidha Digital**, a salary account-opening app for corporate employees: eliminated physical document handling (the primary identity-fraud vector), removed third-party FATCA outsourcing through inline digital declarations, and took the product live across select cities.
- Solved the corporate entity-resolution problem by designing a real-time organisation-code system with an HR-attested fallback flow and a negotiated 48-hour onboarding SLA, cutting new entity onboarding from 10+ days to under 48 hours and preventing customer loss at the point of highest intent.
- Designed KPI strategy and customer journey analytics using SQL, contributing to a 25% increase in product adoption and ~\$500K revenue impact through cross-sell optimisation.
- Implemented enterprise-wide data governance and risk monitoring with anomaly detection, driving GDPR-aligned compliance improvements across consumer banking data.

INDEPENDENT PROJECTS

- **Enterprise AI Readiness Assessment:** consulting-grade diagnostic framework helping banking and financial services organisations across India and the UAE assess AI transformation readiness across six dimensions: data maturity, process suitability, technology infrastructure, talent, governance and change readiness.

TECHNICAL SKILLS

Product Management: Product Roadmap Design, PRD Writing, User Stories, Backlog Prioritisation, KPI and OKR Design, Business Case Development, UAT, Agile/Scrum, Jira, Confluence, Figma, Notion, Executive Presentations

AI and Cloud: AI-assisted product development (Cursor, Claude, applied AI models), Next.js, Supabase, Copilot Studio, Power Platform, Azure (Data Factory, Data Lake), AI agent validation

Analytics: SQL (MySQL, SQL Server), Python, Power BI, Tableau, Alteryx, Advanced Excel, Power Query, Data Modelling

EDUCATION

Bachelor of Commerce | Maharshi Dayanand University, Rohtak, India | May 2016

LANGUAGES

English (Fluent) | Hindi (Native)
